

Project Manager

IT WORKS! is looking for a skilled project manager to provide leadership and direction. This position will serve an integral role full-cycle project management, including aligning projects to business goals, managing stakeholders, communicating project status and milestones, and managing budgets. The ideal candidate will be self-motivated with the ability to adapt to quickly change in a fast pace environment.

Role Responsibilities:

- Provide project schedule(s), critical path and dependency analysis, resource and work allocation, status monitoring and communications, monthly project status reports, and related project management activities.
- Work project stakeholders on a daily basis to identify project requirements and set priorities for the schedule.
- Record action items and monitor project deliverables.
- Manage project budget, including approval submissions.
- Serve as the project lead in the management, coordination, and scheduling of full-cycle software development projects.
- Support and assess the progress of the development team, including QA, to ensure project deliverables are on-time, within the defined budget and scope, and meet or exceed the defined quality standards.
- Work directly with POC for the prime contractor to determine priorities for software releases, demonstrating flexibility in meeting the needs and wants for the overall project.
- Provide direct supervision, mentorship, conflict resolution, and guidance to software development team, including design review and problem-solving.
- Ensure that all procedures are followed, including software defect tracking, quality assurance and time sheet submission.
- Write documentation to support the release processes, review documentation of requirements and testing for completeness.
- Maintain an in-depth understanding of the software's underlying business processes and function as an analyst, specifically in identifying areas of impact throughout the system.
- Lead coordination with internal and external parties (integration points) to ensure deadlines are met and projects are delivered within budget.
- Manage release deliverables in JIRA and Confluence.
- Help develop new business by identifying opportunities with new or existing clients.
- Stay abreast of emerging trends in technology and business models, and conduct an in-depth review from financial, market, technical, and organizational viewpoints about new viable business areas.

Required Criteria:

- Bachelor's degree in Computer Science, Information Technology or related field.
- 2 years or more of relevant experience.

- Ability to obtain a Public Trust Clearance.
- Proficiency with JIRA and Confluence.
- Experience with managing staff and software development projects.
- Excellent analytical/problem solving skills with the ability to able to formulate creative and effective solutions to day-to-day problems and make good decisions on the fly.
- Ability to effectively interact directly with clients and effectively develop, manage, and build positive relationships.
- Ability to work on multiple development initiatives simultaneously while tracking progress against all initiatives.
- Ability to create financial models to project revenues, expenses, and cash flows associated with various business models.
- Experience analyzing and documenting complex workflows.
- Excellent communications skills, especially in communicating technical concepts to non-technical audiences.
- Proficiency in Microsoft Project.
- Expertise in MS Word, Excel, Outlook, Visio and PowerPoint.
- Excellent organizational and planning skills.
- Ability to meet tight deadlines without sacrificing work quality.
- Ability to be flexible and adaptable in a fast-paced environment.
- Ability to work independently or as part of a team.

Preferred Criteria:

- Active Public Trust Clearance.
- Project Management Professional (PMP) certification.
- Experience working with federal contract clients.
