

INTERMEDIATE ASP.NET DEVELOPER

IT WORKS! is looking for an intermediate-level ASP.NET Developer with a passion for best design and coding practices and a desire to develop new bold ideas. Programming functions for this role will include design and specification development as well as system implementation. The ideal candidate will be self-motivated with the ability to adapt quickly to change in a fast pace environment.

Role Responsibilities:

- Interact with relational databases, including Oracle and SQL Server, to retrieve data and display on the front end using JavaScript.
- Perform coding, unit and functional testing, debugging, and deployment of software to production and test environments.
- Provide ongoing system support to end users to resolve problems, performing research as needed.
- Execute user authentication and authorization between multiple systems, servers and environments.
- Create database schemas that represent and support business processes.
- Integrate multiple data sources and databases into one system.
- Additional duties and responsibilities as needed.

Required Criteria:

- Bachelor's degree in Engineering, Math, Science, or relevant field.
- 5 or more years of relevant experience.
- Ability to obtain Public Trust Clearance.
- Experience in ASP.NET software development at the intermediate to advanced level
- Knowledge of common ASP.NET web server exploits and their solutions.
- Understanding of front-end web technologies including AJAX, C#, CSS/CSS3, HTML/HTML5, JavaScript, etc.
- Strong skills working with relational databases such as Oracle or SQL Server.
- Adept in code version control practices and tools such as Subversion.
- Knowledge of object-oriented .NET programming including MVC and Entity Framework.
- Strong database skills including writing SQL queries, writing/updating stored procedures and optimizing queries and indexes for large data sets.
- Understanding of applicable accessibility and security compliance standards.
- Experience in software development lifecycle, business process analysis and requirements analysis.
- Excellent interpersonal and communications skills

Preferred Criteria:

- Active Public Trust Clearance.
