Front-End PHP Developer

IT WORKS! is seeking a front-end developer with extensive PHP knowledge accustomed to working in the LAMP stack. As a member of a development team, the developer will perform programming duties including design specifications, development, and system implementation. They will participate in coding, unit and functional testing, debugging and deploying software to production and test environments in-house and on client sites. Team members also provide Tier II and III technical support as needed, and therefore will be required to support deployments and on-call rotation outside of normal business hours.

IT WORKS! is looking for an individual with a passion for best design and coding practices and a desire to develop bold new ideas. This position requires that the developer wear many hats, as they will be working on multiple projects simultaneously. Work from home possible after an introductory period.

Required Background:

- Bachelor's degree from an accredited U.S. college or university in Computer Science, Engineering or a related subject.
- Minimum of five years of experience as a developer working on web applications.
- Ability to obtain and maintain a Public Trust clearance.
- Proven software development experience in object oriented PHP programming at intermediate to advanced level (specifically PHP 5.2 and 5.6).

Required Knowledge, Skills & Abilities:

- Knowledge of front-end web technologies including HTML5, CSS3, JavaScript, AJAX etc.
- Strong skills working with MySQL or MariaDB and AC Logger.
- Advanced graphic skills for web design utilizing Adobe Creative Suite.
- Familiarity with version control tools such as Git (Bitbucket).
- Experience with jQuery and plugins.
- Extensive experience working with Google Maps APIs.
- Understanding accessibility and security compliance (specifically 508 Compliance and WCAG 2.0).
- Knowledge of common PHP or web server exploits and their solutions.
- Understanding of fundamental design principles behind customer facing websites and applications.
- Well-developed UI/UX skills
- Experience working with clients to determine design and functional elements that work for their platform.

Preferred Knowledge, Skills & Abilities:

- Experience with
    - Gulp
    - JBOSS

- require.js
- jQuery UI
- Carto DB/GIS
