

PHP Developer

IT WORKS is seeking an intermediate PHP developer that performs programming duties including design, specifications development, and system implementation. The team member will be expected to participate in coding, unit and functional testing, debugging and deploying software to production and test environments in an Agile Scrum environment with a fully integrated team. Team members also provide Tier II and III customer support as needed. We are looking for an individual with a passion for best design and coding practices and a desire to develop new bold ideas. We have worked diligently to build a very dynamic Scrum team and seek an individual who is a value add to this highly motivated team.

Required Background

- Bachelor's degree from an accredited U.S. college or university in Computer Science, Engineering or a related subject.
- Public trust or higher clearance from a federal agency.
- Minimum of six years of experience as a developer working on web applications.

Required Skills & Abilities

- Proven software development experience in object oriented PHP programming at intermediate or advanced level.
- Knowledge of front-end web technologies including HTML5, CSS3, JavaScript, AJAX etc.
- Strong skills working with MySQL or MariaDB.
- Familiarity with version control tools such as Git (Bitbucket).
- Experience with jQuery and plugins.
- Understanding accessibility and security compliance for the federal government.
- Strong knowledge of the common PHP or web server exploits and their solutions.
- Understanding fundamental design principles behind a scalable application.
- Knowledge of user authentication and authorization between multiple systems, servers, and environments.
- Strong database skills including writing SQL queries, writing SQL stored procedures, and optimizing queries and indexes for large data sets.
- Familiarity with Oracle databases and their declarative query languages in order to understand legacy systems integrated with new technologies.

Preferred Experience & Abilities

- Scrum Developer training or experience.
- Experience with React.js.
- Previous work within a containerized environment such as Docker.
- Understanding the principles of Continuous Integration.
- Familiarity with consuming content by use of API.
